

Old Bears Barn

Old Bears Barn Bed and Breakfast Eco Policy

We strive to be an environmentally friendly Bed & Breakfast

We recycle as much as we can and encourage our guests to do the same.

Our food waste goes into a bokashi bin which in turn goes into the compost which we then use in the garden.

We encourage guests to re-use towels as much as possible (we will dry them on a daily basis and return them to your room).

We provide eco-friendly refillable toiletries.

Radiators are individually thermostatically controlled.

The cleaning products we use are eco-friendly and refillable where practicable; we use an eco-egg rather than detergents for our laundry and, weather permitting, we dry outside in the fresh air.

We provide home-made or locally-sourced produce wherever possible.

We do not use individually wrapped cereals, jams or yoghurts.

We provide refillable glass bottles of water in each guest room.

We ask our guests to help us by

- Turning off lights and electrical items when leaving the room
- Reusing towels
- Not running water unnecessarily
- Using the recycling bins where possible
